## Blue Castle Holdings President & CEO Speaks at Western Conference of Public Service Commissioners

**PROVO, UT** – Aaron J. Tilton, President and CEO of Blue Castle Holdings, Inc. spoke as a panelist on the topic of “No-Carbon New Generation Technologies in the West” at the Western Conference of Public Service Commissioners held at the Arizona Biltmore in Phoenix Arizona on Tuesday, June 2, 2015.

The panel featured a variety of perspectives from government and industry representatives discussing new no-carbon technologies or, in Blue Castle’s case, a new approach to the development of new nuclear power. The panel was moderated by Commissioner Pam Patton of the Colorado Public Utilities Commission.

During the panel discussion, Mr. Tilton emphasized the approach Blue Castle is taking in developing its new nuclear site that turns typical industry risks into advantages. By securing assets and the regulatory approval for those assets, such as cooling water, land and state tax incentives, the Blue Castle Project provides real value to utilities and nuclear vendors.

Mr. Tilton further explained that Blue Castle’s business model for the nuclear power development side of its business is to select, acquire, enhance, and license a plant site which is well suited for the deployment of new nuclear power generation. This creates an option value for utility equity participation in a licensed new nuclear power plant site.

###
